NEPO Travel Management

Framework NEPO507

Everything you need to know about securing your organisation's travel services through Click Travel and the NEPO framework.

The North East Procurement Organisation (NEPO) travel management framework provides a fully compliant route to market for wider public sector organisations, without the need to complete a costly procurement process.

About the NEPO framework

The framework covers the provision of a managed travel service for the purpose of booking rail and air travel tickets, hotel accommodation and other requirements related to business travel.

The framework allows access to Click Travel's award-winning travel booking system, Travel Cloud, which gives users the freedom to book travel in accordance with their organisation's travel policies.

The system offers line manager approval if required, ensuring that budget holders are kept up to date and informed at all times, as well as allowing organisations to fully integrate their travel policy within the system. Travel Cloud also allows real time access to your organisation's management information and even enables the use of cost codes in order to capture departmental spend, affording complete visibility of how you book travel at all times.

Can I sign up?

All wider public sector organisations are able to join NEPO, regardless of their location in the UK. The NEPO Travel Management Framework (NEPO507) offers a compliant route to market for it's members, without the need to conduct their own procurement process.

How to sign up

To sign up with NEPO as an associate member (this is free to do!) you just need to register. Following this, you complete a simple 2 page order form, and then Click Travel will handle your implementation in full.

Further details can be found on the NEPO website:

https://www.nepo.org/solutions/travel, or by contacting **adam.smith@nepo.org.**
